FOREWORD

Our sale of September 20th was successful. To every complaint, we received 99 letters expressing satisfaction with the coins purchased and the manner in which we catalogued them. The number of bids received verifies our belief that collectors are willing to support cataloguers who endeavour to describe coins conservatively and accurately.

Before the sale we received many enquiries for estimates. This has caused us to consider the advisability of printing in the catalogue the estimated value of each lot. This is not a new idea by any means, but rather one that has been used and abused to a considerable extent.

There is a tendency among some cataloguers to exaggerate the value of a coin. However, the estimate system is used in Europe in quite a satisfactory manner and there is no reason why the system could not be used here. There is more than one method of giving the value of a coin. In France the reserve value is placed on each lot and no bids for less than that amount will be accepted. But before we adopt a plan for placing a value on lots we are inviting our buyers to express their opinion. If the majority are in favor of an estimated value being given we will include it in our catalogue. If not, we will continue to give estimates only upon request.

May we remind our bidders again that all bids are by the "lot" and not by the piece. And that, while no reserve has been placed on any lots, they have been so catalogued as not to be worth less than 50 cents each. Bids for less than this amount will not be entered.
